PROFESSIONAL SUMMARY

Junior Software & Full-Stack Developer specialized in the MERN stack (MongoDB, Express.js, React.js, Node.js) and modern AI implementation. Hands-on experience building responsive web applications, RESTful APIs, and integrating AI models into automated software solutions. Strong foundation in JavaScript, asynchronous programming, Git workflows, and API design. Eager to deliver clean, scalable code and continuous innovation within competitive software development environments.

TECHNICAL SKILLS

Languages & Web:	JavaScript (ES6+), HTML5, CSS3, Python
Frontend Dev:	React.js, Bootstrap, Material UI, Tailwind CSS
Backend & Database:	Node.js, Express.js, MongoDB, Mongoose, REST APIs
AI & Automation:	Model Context Protocol (MCP), OpenAI API, AI Chatbots, Automation Workflows, Cursor
Tools & Control:	Git, GitHub, Shopify API
Soft Skills:	Problem-Solving, Technical Collaboration, Agile Practices, Adaptability

CERTIFICATIONS

Anthropic — Certificate of Completion: AI Fluency Framework & Foundations	[Verify Certificate]	2026
Anthropic — Introduction to Model Context Protocol	[Verify Certificate]	2026
Anthropic — Claude Code 101	[Verify Certificate]	2026

FEATURED PROJECTS

AI Dropshipping Platform | MERN Stack, Shopify API, OpenAI API [\[GitHub\]](#)

- Engineered an intelligent eCommerce system utilizing MERN stack architecture integrated with Shopify API.
- Integrated OpenAI API to enable customer service chat automation and automated product recommendation workflows.
- Developed a dynamic analytics dashboard supporting automated inventory sourcing and price optimization routines.

CarInventory Web Application | MERN Stack, JWT, Bootstrap [\[GitHub\]](#)

- Built a secure full-stack CRUD application for centralized vehicle inventory tracking.
- Implemented JSON Web Token (JWT) user authentication and protected REST API endpoints via Express.js and MongoDB.

Weather Dashboard App | React.js, WeatherAPI [\[GitHub\]](#)

- Developed a real-time weather monitoring interface incorporating asynchronous API consumption and browser geolocation features.

iTunes Search Engine App | React.js, iTunes Public API [\[GitHub\]](#)

- Constructed an interactive media search platform featuring dynamic real-time query rendering and modular state management.

TECHNICAL EXPERIENCE

Stellenbosch University / HyperionDev	Mar 2025 – Aug 2025
Web Development Intern / Trainee	
• Developed scalable full-stack web platforms and administrative tools using JavaScript, React.js, Node.js, Express, and MongoDB. • Collaborated on code reviews, pair programming tasks, and Agile sprint workflows. • Portfolio verification: HyperionDev Portfolio	

EDUCATION & CONTINUOUS LEARNING

Stellenbosch University / HyperionDev	2025
Full-Stack Web Development Certificate	
Independent Technical Learning	2025 – Present
• Deepening expertise in Python, Machine Learning fundamentals, and AI API orchestration.
